

案例 1

阅读语篇教学设计 **John Snow Defeats “King Cholera”**

主题语境：人与社会——科学家与科学研究

语篇类型：介绍性文章

授课时长：两课时（每课时 45 分钟）

文本分析

本课是一篇介绍科学家的阅读文章。该文介绍了医学科学家 John Snow 从发现霍乱成因中的问题、提出假设，选择调查方法、收集和分析数据、寻找支持证据，直到最后得出结论并提出解决方案的整个过程。文章按照科学研究的步骤和时间顺序展开。重点词汇主要涉及疾病、治疗、病因等，如：defeat, physician, expose, cure, suspect, blame，句式主要涉及有关科学研究步骤和具体方法等，词汇还涉及一些有关 John Snow 的为人品质的描述。本文的价值取向在于学生通

过本文的学习，体会到英国的医学科学家 John Snow 在霍乱防治领域所作出的突出贡献和他作为杰出科学家正直的人品和科学严谨的态度。

学情分析

本班学生英语基础较好，学习态度较认真，学习热情高。学生已基本具备在阅读中获取细节信息的能力，部分学生能用英语自信地表达观点。但是多数学生在理解和整合知识、逻辑推理和分析论证观点，以及批判评价方面的能力都比较欠缺。此外，虽然学生对著名科学家及其贡献有一定程度的了解，但此前与之相关的知识结构并不系统，对科学研究的具体步骤了解不全面，对科学精神缺乏深层理解，对霍乱以及 John Snow 都比较陌生。

教学目标

在本课学习结束时，学生能够：

1. 获取梳理文中有关 John Snow 本人和他调查并阻止霍乱蔓延的事实性信息；
2. 概括、整合、阐释 John Snow 为阻止霍乱蔓延所采取的研究步骤；
3. 推断 John Snow 作为科学家的优秀品质并举例论证；
4. 以 John Snow 战胜霍乱的事件和他的优秀品质为依据，举行（模拟）答记者问；
5. 总结优秀的科学家的精神，即不仅要有科学的方法，还要有爱心和社会担当。

教学重点

学生通过阅读，获取关于 John Snow 研究霍乱起因全过程的事实性信息，整合推断出科学研究的步骤以及科研精神。

教学难点

学习 John Snow 如何采用科学研究的方法和步骤解决霍乱这一难题的过程；在模拟组织答记者问的活动中，总结杰出科学家的优秀品

普通高中英语课程标准（2017年版2020年修订）

质，达到对科学精神的深层理解。

教学资源

教材、多媒体课件、学案、黑板和粉笔。

教学过程

步骤	教学活动	设计意图	互动时间 & 模式
Pre-reading			
Step 1	Ss watch a video about what happened to Haiti in 2013 and learn about the outbreak of cholera. Ss watch the video again and identify the main symptoms of cholera.	创设情境，引出主题，理解关键词汇。	5' IW
Step 2	T directs Ss' attention from Haiti to London 160 years ago by showing a picture of the cholera outbreak at that time. Ss share their understanding of and feelings about the situation. T invites Ss to think, "If you were a doctor, what would you do to deal with the situation?" Ss discuss in groups what they would do and share their ideas with the whole class.	利用视频和图片，创设语境，导入主题，激活学生已有的关于解决问题的认知和经验。	5' IW GW
While reading			
Step 3	1st reading Ss read the title "John Snow Defeats 'King Cholera'" and predict what might be talked about in the text. T invites Ss to read the first part of the text and answer three questions: 1. Who was John Snow? 2. Why cholera was called "King" at that time? 3. How did cholera kill people?	提取有关 John Snow 和霍乱的背景信息和基本事实性信息。	10' IW

续表

步骤	教学活动	设计意图	互动 时间 & 模式
Step 4	After the feedback, Ss continue reading and find out what John Snow did. Students are encouraged to mark the map with the locations based on the information provided in the text. 2nd reading T asks each student to read the text carefully again and use a flow chart to note down all the important steps taken by John Snow in his investigation; then share and revise their flow charts in groups. Ss are encouraged to use a dictionary if they come across any new words. T invites two groups to draw their flow charts on the board and then describe the process to the whole class. Based on the information from the text, T asks Ss to answer the following questions: 1. Did it make sense for John Snow to believe in the 2nd theory? Why? 2. Why did John Snow mark information on the map? 3. When John Snow found a sharp contrast in the death tolls between two neighbouring streets, what did this evidence lead him to conclude? 4. Did John Snow make his research results public the minute he found out that the polluted water might be to blame? Why not? What did he do instead?	进一步梳理细节信息，概括、整合 John Snow 的研究过程。利用工具书解决阅读中的问题。在描述阐释的过程中实现语言和知识的内化。 引导学生发现并深入理解 John Snow 严谨的科学精神。	10' IW 20' IW GW
Step 5	3rd reading • Ss read through the text again, identify what it is trying to tell the readers, and summarise the main idea in one sentence.		8' IW

续表

步骤	教学活动	设计意图	互动时间 & 模式
Step 6	- Ss share their summaries first in groups and then with the whole class. 4th reading - Ss read the text again and then in groups discuss the qualities of John Snow based on what he did, giving evidence to support their conclusions. For example: John Snow was “caring and loving” because he chose to risk his own life to help ordinary people. - T provides a mind map on the board and invites all the groups to add more words describing John Snow’s qualities. - Different groups are invited to explain their choice of words with evidence found from the text.	引导学生概括总结所学内容。 帮助学生深入理解 John Snow 与众不同的人品和优秀的科学家品质。	10’ GW CW
Post-reading			
Step 7	- Ss work in groups to prepare a press conference where John Snow is to answer questions raised by different reporters. 1) Reporters: come up with at least three questions regarding information about John Snow and what he did to defeat cholera. 2) John Snow: give answers by using the information from the text as well as one’s own understanding and interpretation. - Ss present their questions at a press conference with appropriate manners as a media reporter. John Snow answers the questions. - Ss and T together reflect and summarise what has been learned.	巩固并整合所学语言和内容，学生通过得体提问并理性回答，进一步加深对 John Snow 阻止霍乱的研究步骤和科学精神的理解。师生共同探讨科学家精神的特质，体现迁移创新。	20’ GW CW

续表

步骤	教学活动	设计意图	互动时间 & 模式
	Homework - As a reporter, write a new article on “How John Snow Defeated Cholera”. - Plan and conduct a research project. Find a problem in your daily life. Work out a series of steps to investigate the problem. Carry out the research and write down the steps you take and what you have found.		2'

备注:

Ss: Students T: Teacher IW: Individual work GW: Group work CW: Class work

案例说明

本案例教师基于语篇解读和学情分析，设计了五个层层递进、相互关联的教学目标。教学活动设计以目标为导向，紧密围绕 **John Snow** 放弃优越的工作和生活，通过科学严谨的方法，打败霍乱的事件展开。教学活动设计体现了学习理解、应用实践、迁移创新三类活动的关联与递进。教师首先创设情境，从学生的已知出发，引导学生探究这一过程的事实性信息，进而梳理整合科学家分析问题和解决问

题的步骤和方法。在此基础上，学生概括文本的信息结构，形成对开展科学研究所需要的重要品质和方法的感知和认识，最后总结归纳科学研究的过程和科学家精神，把语言知识学习、语言技能运用、思维品质发展和文化意识形成都有机融入课程内容和教学活动中，为在课堂教学中培养学生的英语学科核心素养进行了有益的尝试和探索。

课文原文

JOHN SNOW DEFEATS “KING CHOLERA”

John Snow was a famous doctor in London—so expert, indeed, that he attended Queen Victoria as her personal physician. But he became inspired when he thought about helping ordinary people exposed to cholera. This was the deadly disease of its day. Neither its cause nor its cure was understood. So many thousands of terrified people died every time there was an outbreak. John Snow wanted to face the challenge and solve this problem. He knew that cholera would never be controlled until its cause was found.

He became interested in two theories that possibly explained how cholera killed people. The first suggested that cholera multiplied in the air. A cloud of dangerous gas floated around until it found its victims. The second suggested that people absorbed this disease into their bodies with their meals. From the stomach the disease quickly attacked the body and soon the affected person died.

John Snow suspected that the second theory was correct but he needed evidence. So when another outbreak hit London in 1854, he was ready to begin his enquiry. As the disease spread quickly through poor neighbourhoods, he began to gather information. In two particular streets,

the cholera outbreak was so severe that more than 500 people died in ten days. He was determined to find out why.

First he marked on a map the exact places where all the

Note: — : 1 death PH: public house 30, 31, ... : numbers of houses

Part of Snow's Cholera Map

dead people had lived. This gave him a valuable clue about the cause of the disease. Many of the deaths were near the water pump in Broad Street (especially numbers 16, 37, 38 and 40). He also noticed that some houses (such as 20 and 21 Broad Street and 8 and 9 Cambridge Street) had had no deaths. He had not foreseen this, so he made further investigations. He discovered that these people worked in the pub at 7 Cambridge Street. They had been given free beer and so had not drunk the water from the pump. It seemed that the water was to blame.

Next, John Snow looked into the source of the water for these two streets. He found that it came from the river polluted by the dirty water from London. He immediately told the astonished people in Broad Street to remove the handle from the pump so that it could not be used. Soon afterwards the disease slowed down. He had shown that cholera was spread by germs and not in a cloud of gas.

In another part of London, he found supporting evidence from two other deaths that were linked to the Broad Street outbreak. A woman, who had moved away from Broad Street, liked the water from the pump so much that she had it delivered to her house every day. Both she and her daughter died of cholera after drinking the water. With this extra evidence

普通高中英语课程标准（2017年版2020年修订）

John Snow was able to announce with certainty that polluted water carried the germs.

To prevent this from happening again, John Snow suggested that the source of all the water supplies be examined. The water companies were instructed not to expose people to polluted water any more. Finally “King Cholera” was defeated.
